Media Platforms Design Team Stand next to your support, feet in a narrow V. Rise onto the balls of your feet, keeping your heels glued together; bend your knees, bringing your butt down toward knee level. Slowly move down and up by an inch for 30 seconds. Repeat, smaller and faster, for another 30 seconds. Watch Next An ITU standard for high-speed synchronous data exchange. In the U.S., V.35 is the interface standard used by most routers and DSUs that connect to T-1 carriers. Regulation V is the federal regulation adopted by the Consumer Financial Protection Bureau (CFPB) to ensure confidential consumer data reported in credit reports is protected and accurate, as stipulated in the Fair Credit Reporting Act (FCRA). The Fair Credit Reporting Act (FCRA) is a legal document that states you are allowed to see whatever information a credit reporting agency (CRA) has about you. Anytime the CRA submits new information to your file, you are entitled to know about it. Regulation V is the portion of the FCRA that implements those allowances and entitlements for the consumer. You also have the right to object to information on your report if it is inaccurate. If you do so, Regulation V states you must receive a response within five days of your initial request. This disclosure must be written and mailed to the consumer no later than five days after the date on which the request was received from the consumer or such report was first requested, whichever is later. The FCRA was passed by Congress in 1970, and for many years, a variety of federal agencies maintained the rule-making responsibilities established in the act. In 2011, the Dodd-Frank Act transferred rule-making authority to the CFPB, which is the current agency that oversees Regulation V. The purpose of Regulation V is simply to implement the FCRA. Regulation V applies to: Consumer reporting agencies Those who obtain consumer credit histories to determine their participation in purchases and employment Individuals who share consumer information with affiliates Anyone who provides credit reporting agencies with consumer information A credit report contains detailed financial information about a consumer, which is all relevant to Regulation V. That information includes the consumer's name; current and previous addresses; employer; revolving accounts; installment loans; open and closed accounts; payment history; recent credit applications; debts in collection; and any public records such as a bankruptcy or foreclosure on a home. Consumer credit information is generally used to determine the likelihood that an individual will receive credit products such as a loan or credit card. However, credit reports are also used in general vetting processes, such as when an employee is screened by a potential employer. For this reason, Regulation V serves as protection of the consumer's privacy. For example, let's say you take out an installment loan on a car. Regulation V ensures the bank reporting the loan will provide accurate information, and the information remains private and confidential. This helps alleviate the risk of identity theft by placing the responsibility of accuracy on the reporting parties and not on the consumer. Consumers should check their credit reports regularly for inaccurate information. Incorrect information on a credit report can affect one's ability to obtain credit, secure a mortgage, or even be eligible for employment at certain companies. After Congress passes a law, a federal agency will issue a set of requirements to implement that law, officially deeming it a regulation. Regulation V is the federal regulation issued by the CFPB that is responsible for implementing the fair credit reporting of the FCRA. Prior to the adoption of a regulation, the federal agency will propose the requirements and invite public comments on them. After review and possible revisions, the agency will then formally issue the regulation. In the case of Regulation V, rulemaking authority was once in the hands of a number of federal agencies, and it is now solely in the hands of the CFPB as of July 21, 2011. The CFPB is the federal agency that protects consumers from abusive and deceptive practices, and also maintains Regulation V. When necessary, the CFPB takes legal action against companies that break the law. If FCRA rights are violated, consumers are entitled to seek damages from a consumer reporting agency or user of consumer information in credit reports. While there are both federal and state consumer laws, consumers often have more protection under their state laws. Contact your state's local consumer protection agency, or utilize one of the CFPB's tools and resources for consumers. Regulation V outlines consumers' rights under the FCRA, and provides precise language in explaining those rights so both consumers and reporting parties understand what is legal to report and what is not. Topics covered in the regulation include: Identity theft Duties of companies holding consumers' information Duties of users and consumer reports Duties of consumer reporting agencies Filing disclosures to consumers Affiliate marketing Use of medical information Regulation V is the federal regulation that implements the Fair Credit Reporting Act. Regulation V ensures consumer financial information is protected, private, and accurate in credit reports. Per Regulation V, consumers have the right to dispute inaccurate information and see new information reported to their credit files by credit reporting agencies. The Consumer Financial Protection Bureau (CFPB) maintains Regulation V. You can play the game on pretty much any platform (except iOS), from the latest consoles and PC to even some of the best phones on the market. With the game being as popular as it is, it's not too shocking to see that it continually makes a ton of money off of in-game microtransactions. However, those new to the game may be wondering what's the smartest way to spend money in Fortnite, and whether or not you should buy V-Bucks at all. Thankfully, we've got you covered. How much is a V-Buck? Source: Android Central (Image credit: Source: Android Central) Before we talk about getting the best value out of your V-Buck, we should first break down the value attached to the currency itself. The smallest amount you can buy is 1,000 V-Bucks for \$10, so that sets the base value of a single V-Buck around one cent, although you won't find anything in the Fortnite store for less than 500 V-Bucks. That makes the base in-app purchase around \$5. Of course, Canadians and anyone living outside the U.S. will end up paying more based on the currency exchange rate. Here are the pricing levels for buying V-Bucks via in-app in USD: 1,000 V-Bucks for \$7.99, 5,000 V-Bucks for \$31.99, 13,500 V-Bucks for \$79.99. It's worth noting that the V-Bucks you buy on a specific platform stay with that platform, so if you've bought 1,000 V-Bucks on an Xbox or PlayStation, you won't see them in Fortnite Mobile and vice versa. However, once you've spent your V-Bucks on items you'll be able to access them across all the platforms you play. Because Fortnite is no longer available on the Google Play Store, players will have to purchase V-Bucks on their mobile devices through the in-game Epic Direct Payment system, so you won't be able to use any Google Play credit toward your V-Bucks purchase. Battle Pass Source: Android Central (Image credit: Source: Android Central) To keep Fortnite free-to-play, Epic Games implemented Battle Pass seasons. Each season sees players completing objectives to rank up through tiers and unlock in-game rewards along the way. Players are given a free Battle Pass with its own dedicated objectives and rewards, but the premium Battle Pass, available for 950 V-Bucks, lets you unlock up to 100 in-game rewards throughout the season. Right from the start, if you're able to make it through 90% of the season tiers you'll be able to win back enough V-Bucks to cover the cost of the next season's Battle Pass — pretty good motivation alone. You'll also get the hottest skins and features of the season in the form of outfits, harvesting tools, gliders, emote dance moves, and other goodies. For those who prefer to have constant access to the most current Battle Pass on top of a stream of rewards, Epic Games also offers a subscription service, known as Fortnite Crew, that gives players 1,000 V-Bucks every month, access to the newest Battle Pass, and a monthly Crew pack that includes an exclusive outfit bundle. The subscription will run players \$11.99 every month, so this should be reserved for those who play nothing but Fortnite. Cosmetic upgrades Source: Android Central (Image credit: Source: Android Central) On top of the stuff you can unlock throughout the Battle Pass season, you're also able to directly buy cosmetic upgrades from the in-game shop. The catch is that only a limited number of items are available at one time, and the items available rotate out every day. I found a great resource for tracking all the Fortnite cosmetics that lets you scope out what's currently available, with there are four categories available on your character to upgrade: Outfits: These affect the overall look of your character and is the most significant cosmetic upgrade. There are a ton of outfits available and while some are much bigger it's worth noting that a bigger outfit does not necessarily increase your character's hitbox. It's also worth considering that the flashier the outfit the more you will stand out in the field, so that's something to keep in mind if you prefer stealth play. Outfits start as low as 800 V-Bucks for Uncommon outfits and up to 2,000 V-Bucks for Legendary outfits. Harvesting Tool: By default, Fortnite gives you a generic pickaxe for busting down walls and harvesting building supplies but you can swap out your trusty pickaxe with a wide range of crazy skins for your trusty tool. These have no effect on your harvesting ability but can look pretty fun. There's also typically a corresponding harvesting tool for each outfit if you're a stickler for continuity. Harvester tools can be bought for as low as 500 V-Bucks and as high as 2,000 V-Bucks. Glider: Upgrading your glider gives you no speed advantages over your opponents, although it can sure look intimidating to see an upgraded glider floating around your landing area at the start of the game. Uncommon Gliders start at 500 V-Bucks, while a Legendary Glider costs 1,500 V-Bucks. Emotes: There's nothing sweeter than busting out a quick dance move after you've knocked out an opponent, knowing that the other player has a front row seat for your antics on the kill cam. There are over 80 different Emotes to be unlocked or bought and they start as low as 200 V-Bucks. What's the best value? Buying cosmetic upgrades in a free-to-play video game such as Fortnite is akin to donating to the developer. You get a modest reward that helps your character stand out while investing in the longevity and profitability of the game itself. It's also 100% optional and can get really expensive if you get hooked on upgrading your character on a regular basis. Let's take a look at how much someone could hypothetically spend to fully kit out their Fortnite character, based on the average price of items available in the item shop: New Outfit: 1,500 V-Bucks New Harvesting Tool: 800 V-Bucks New Glider: 800 V-Bucks New Emote: 500 V-Bucks Total spent: 3,600 V-Bucks, or \$35 in in-app purchases That's a sizeable chunk of change for some digital apparel. If you're a parent with kids begging you to buy them V-Bucks, you ought to know just how easy it is to blow through that \$25 in-app purchase in just a few quick taps. Should you buy V-Bucks? In my opinion, you should only invest in V-Bucks if you're a diehard Fortnite player and you play across multiple platforms. A Battle Pass upgrade is a great place to start, as a thrill-seeker with just a Battle Pass upgrade has the potential to unlock a good collection of gear through just one season of play. The \$25 pack that gives you 2,800 V-Bucks is probably your best value, as you'll be able to afford a premium Battle Pass for the upcoming season while maintaining a V-Bucks balance in case something in the item shop really catches your eye.
